Report

The interactive session on "How to excel in symposium" was held on 9.9.2014 at Electrical seminar hall. The purpose of this session is to make the students aware of various events in symposium.

The interested students from second and third year of B.E Civil engineering were participated in this interactive session. The number of students attended the session was 50. The session started by Selvan. R.Rajasekar (11BCE037) who addressed the students on the technical paper presentation. He highlighted the standard format of preparing the technical paper. Selvan. Karthik Rajaram (11BCE019) gave tips to the student on the concepts of "Confloat-floating structure". He explained the principle behind the floating structure and the methodology of its manufacturing.

Selvan R.Manthiram @ Karthik (11BCE026) gave the overall view of the symposium events. He adorned the preparation procedure and tips for other events such as poster presentation, quiz, code cracking and surveying.

At last, Mr.S.Syed Masoodhu staff in charge of beavers addressed the gathering and summarized the discussed points. He encouraged the students to post queries about the session. It was followed by the feedback session of students. Selvan P.Balaji (12BCE007), Selvi D.Nivetha (13BCE022), Selvan R.Gowtham (13BCE033), Selvi K.Hari Dharsini (14BCE403) gave their comments about the session.
