How to manage time and be productive

“sometimes later becomes never, so just do it.”

We all would have felt overwhelmed when we were bundled up with work which we missed to do a day before or a week before. We wouldn't have finished a work in time and procrastinated it. And on some day we might have had a situation to finish all those in the day. Now, how to avoid these kind of situations. Let's see that in this article.

Plan it

It is always easy to follow the things which have been written, so schedule your days by making a plan. Schedule tasks to do at a particular time. In that way you won't miss tasks to be done at time. You won't miss it to finish it before deadlines.

Prioritize it

	URGENT	NOT URGENT
IMPORTANT	Do it Now	Schedule
NOT IMPORTANT	Hire or ask someone else to do it Don't do it .	Don't do it . Delete it from your schedule

Credits: mento learn

Now this table referenced from Mento learn, a creative education platform says it all clearly. Plan your tasks based on their priority. Know the importance and urgency of the tasks that has to be finished and act according to it.

Say No

Now this is an important way to avoid running out of time. At times you would have asked by your family members or friends to do a task for them . You would hesitate to say no even though you have other important tasks in hand because you think they might get offended. But here is the important thing. If you are asked by someone to do so , just think if can handle your things and finish them in time if their task is also added to your schedule. If you feel no say them no. If you have persons who don't understand the importance of your tasks , don't change your schedule , change your friends. A person who cannot help you you cannot be your friend.

Know The Deadlines

Every task has a deadline . As I said earlier, do the most important and urgent tasks first. Know your deadlines. Nothing would benefit you if you finish a task after the deadline, so be conscious of the deadlines and finish them in time.

Be Imperfect

“Something is better than nothing.”

Sometimes you would have procrastinated things just because you can do that particular thing perfect in future. Now see, there is nothing called perfection. Just do the tasks when you have time based on their priority. It is always better to do something imperfectly instead of doing nothing. It is worse to procrastinate something , because you might never get time to do it.

Enjoy

Also have time to sit back and relax. Have time to enjoy. Never feel like you are running out of time . Do the tasks to be done for work in work time. Don't use your leisure time to finish those. I am not saying you should never use your leisure time to do things but you need rest too. You cannot be productive unless you have proper rest . Now rest does not mean only sleep. It means being relaxed for sometime, doing things you like for some time. Do them without fail in your leisure time.

If you have proper scheduling and prioritizing , you will never run out of for finishing tasks and you will have leisure time to do the things you like . Always remember, it is better to do a task imperfectly instead of procrastinating it. Enjoy.

D.Murali Prasath

Department of Information Technology

Vision of the Department

To become a Centre of Excellence in education and research in the field of Information Technology, to meet global challenges in computing industries

Mission of the Department

- To impart world-class knowledge in the field of Information Technology
- To promote industry-institute interactions to empower the faculty members and students
- To support and facilitate research and development activities
- To develop all round personality by inculcating the values and skills needed for students to upgrade themselves as IT professionals

Programme Educational Objectives (PEOs)

B.Tech. Information Technology graduates will:

PEO 1. Technical Expertise: Have high level of technical competency to identify problems and to generate innovative solutions, which would conform to the needs of IT industry

PEO 2. Lifelong learning: Successfully adapt to changes in roles and responsibilities, through lifelong learning, for collaborating professionally with various stakeholders

PEO 3. Ethical Knowledge: Ethically apply their computing knowledge and skills considering societal, economic and environmental factors

Program Outcomes

Engineering Graduates will be able to:

- PO1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- PO2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- PO3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- PO4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- PO5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- PO8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- PO9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- PO10. **Communication:** Communicate effectively on complex engineering activities with

the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Program Specific Outcomes (PSOs)

The graduates of Information Technology Programme will be able to:

PSO1. Open source software: Develop customized solutions for real world problems using open source software

PSO2. Data science: Manage, store, retrieve and analyze the voluminous data efficiently
