## **Department of Information Technology**

### **Vision**

**To become a Centre of Excellence in education and research in the field of Information Technology, to meet global challenges in computing industries.**

### **Mission**

**To impart world-class knowledge in the field of Information Technology.**

**To support and facilitate research and development activities.**

**To promote industry-institute interactions to empower the faculty members and students.**

**To develop all round personality by inculcating the values and skills needed for students to upgrade themselves as IT professionals.**

### **Programme Educational Objectives (PEOs)**

**The graduates will:**

**PEO1. Technical Expertise: Have high level of technical competency to identify problems and to generate innovative solutions, which would conform to the needs of IT industry.**

**PEO2. Lifelong Learning: Successfully adapt to changes in roles and responsibilities, through lifelong learning, for collaborating professionally with various stakeholders.**

**PEO3. Ethical Knowledge: Ethically apply their computing knowledge and skills considering societal, economic and environmental factors.**

## **Programme Outcomes (POs)**

**The graduates of Information Technology Programme will be able to:**

- PO 1. Engineering knowledge:** Apply knowledge of mathematics, science, engineering fundamentals and an engineering specialization in the field of Information Technology.
- PO 2. Problem analysis:** Identify, formulate, analyze and solve complex problems in computing industries using principles of mathematics, natural sciences and engineering sciences.
- PO 3. Design/development of solutions:** Design a software solution for complex engineering problems and design system processes to meet specific needs with appropriate consideration for public health and safety, cultural, societal, and environmental considerations.
- PO 4. Conduct investigations of complex problems:** Conduct investigations of complex problems including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusion.
- PO 5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- PO 6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- PO 7. Environment and sustainability:** Understanding the impact of engineering solutions in social environment and exhibit the knowledge for sustainable expansion.
- PO 8. Ethics:** Realize and bind to professional ethics and the norms of engineering practices.

## **Programme Outcomes (POs)**

**The graduates of Information Technology Programme will be able to:**

**PO 9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.

**PO 10. Communication:** Communicate with engineers and society to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions related to IT Professionals.

**PO 11. Project management and finance:** Demonstrate and apply the knowledge of engineering and management principles to one's own work, as a team leader or a member to manage project in multidisciplinary environments.

**PO 12. Life-long learning:** Recognize the need for, and have the ability to engage in independent and life-long learning in the context of technological change.

## **Programme Specific Outcomes**

**PSO 1. Open Source Software:** Able to develop customized solutions for real world problems using open source software.

**PSO 2. Data Science:** Able to manage, store, retrieve and analyze the voluminous data efficiently.

# Student Activities'
