During my college days, I see a transferable set of competencies that got built up over a period of time in me. ***“We don’t grow when things are easy, we grow when we face challenges”***. I completely resonate with this adage. Challenging years escalated me on the learning curve and led to my personal development. When I say challenging, series of tests, personal development classes, opportunities to hone the skills (cultural and technical fete, workshops, seminars, conferences etc). Accentuating key points & recapitulating my journey @ MCET:

- I met different people and that’s how I got different perspective
- Four years were like burning in a crucible and coming out refined, having those leadership qualities like perseverance, grit and embracing the chaos
- Opportunities made me equipped profoundly
- Staff who owned my development.

Logesh Krishna R, II CSE completed the one-day 4.0 Tech Online Bootcamp course on “Cyber Security” offered by NXT Wave.
